

## High performance Instrumentation Amplifier for strain-gage transducers

-High-performance processing (Sampling Speed: 4000 times/s, 24-bit A/D converter)

- Substantial comparison functions (Extra high, high, OK, low, and extra low)
-Analog output (A D/A converter is equipped)
- Various optional interfaces (BCD output, RS-232C, RS-485, and CC-Link)
- Numeric data and comparators' LED Display in red, green, or orange

The WGA-680A series is compact, moderate price instrumentation amplifiers enable direct reading of physical quantities such as loads due to high-speed sampling.
Comparator, hold functions and D/A converted signal output are standard equipped.
Suitable for measurement and control of quickly changing phenomena by press-fitting or pressing
